Note:

Special Research Programs and National Research Networks are large scale programs funded by FWF involving several collaborating working groups led by internationally recognized scientists. This list gives the names of the program coordinators, for detailed information on the collaborating working groups please refer to the program web pages.

A FWF Doctoral Program is a unit offering a structured educational program to doctoral students based on a clearly defined mid-term research programme by several scientists or scholars whose research is of an internationally leading standard. This list gives the names of the program coordinators, for detailed information on the collaborating working groups please refer to the program web pages.

The Wittgenstein Award, administered by FWF, is the most renowned science prize and the most generously supported research program in Austria. Only 1 or 2 scientists per year receive a Wittgenstein award.

For further Austrian research groups participating in the CSC-FWF Scholarship Program please refer to the corresponding document.

An eligible application for a CSC-FWF scholarship consists of a form downloadable at FWF's webpage (<http://www.fwf.ac.at/de/internationales/csc2012.html>), a motivation letter and CV as well as any other documents required by the respective host institution. Applications have to be submitted directly to the Austrian Science Fund (FWF) which will register and forward them to the respective Austrian host institution.
